

Bank AlJazira: Managed Cloud-native Digital Applications Operations

Challenge

- Bank AlJazira set out on a digital transformation. As the prime vendor on this engagement, Red Hat partnered with SOL for consultancy services involving architecture design and delivery of cloud-native services using Red Hat OpenShift across multiple environments.
- Deployment of middleware Operators and supporting BAJ teams in setup of CI/CD.

Solution

As part of our engagement with Bank AlJazira, the following services were provided:

- Solution design and architecture
- Deployment of Red Hat OpenShift and other critical services
- Design and delivery of the **DevOps landscape** including Continuous Integration, Continuous Delivery and Continuous Deployment.

Business Benefits

- Objectives set out for digital transformation journey were met within agreed timelines.
- Smooth rollout of OpenShift based services across multiple environments.
- Upskilling of client technology teams in ways of managing containerized workloads on Red Hat OpenShift.
